The challenge of privacy

For corporations and individuals alike, Data Privacy is changing the way we work and behave with private data and offers tremendous opportunities for knowledgeable professionals. With dedicated trainings and certifications in the field of Data Privacy, Satom IT & Learning Solutions is at the center of this emerging new discipline and offers a unique platform to get trained and certified on Data Privacy.

Our partnership with the International Association for Privacy Professionals (IAPP) covers Data Privacy with three

dedicated trainings and certifications : CIPP/E, CIPM and CIPT and our new curriculum on the Federal Act on Data Protection (FADP) provides you with the necessary trainings to be compliant with the upcoming implementation of the revised Swiss law.

Tools to master the challenge

Swiss Data Protection training

Course Description

Our new training on the Federal Act on Data covers the changes introduced by the new Swiss Federal Act on Data Protection (n-FADP) and compare its implementation with the European General Data Protection Regulation (GDPR) and identify practical steps to implement the necessary compliance .

Audience

Whether you are just starting your data protection learning journey, or you are an experienced professional, this course will enable you to understand the particularities of the Swiss data protection framework in context.

Delivery

This training can be delivered Online, Live Online, on premise or Hybrid. Private sessions can be organized on request at customer location and/or at our center.

IAPP Data Protection training

Course Description

IAPP trainings & certifications validate your knowledge in data privacy. With the CIPP/E, CIPM and CIPT training you learn how to manage data privacy in the Laws and Regulations, Operations and Technology field.

Audience

The CIPP/E, CIPM and CIPT trainings are intended for European and international privacy professionals managing or working with GDPR and European national security laws

Delivery

These trainings can be delivered Online, Live Online, on premise or Hybrid. Private sessions can be organized on request at customer location and/or at our center.
